

# Louisville Science Center

## Louisville, Kentucky

Completion: 1996

Owner: Metro Louisville

Role: Complete Architectural Services

This building consists of three separate projects. The first was a renovation of the historic façade on Main street. Complete restoration of the building exterior started with masonry repairs, structural repairs, and building cleanup. Historic colors from the time of the building construction were selected and applied to the building to illustrate the different architectural elements, making the building itself a teaching tool. The second was the KidZone exhibit. An informative area of the museum designed for young minds to have a hands on experience with learning. Third, a new entry system was installed which functioned better than past systems.
